Say I have the following CREATE TABLE occurrences (id INTEGER PRIMARY KEY AUTOINCREMENT, text TEXT); SELECT text FROM occurrences ORDER

BY TEXT DESC; With the following data 1 "This is a text to appear in the first row" 2 "This is a different text to appear in the first row" 3 "This is another text to appear in the first row" 4 "This is a third text to appear in the first row" 5 "This is a fourth text to appear in the first row" 6 "This is another text to appear in the first row" 7 "This is a fifth text to appear in the first row" What query would return the second and fourth row? A: Try this: `SELECT * FROM occurrences WHERE text = (SELECT max(text) FROM occurrences WHERE text LIKE '%the text you're looking for%')` `x020E, 0x023D);` `_font32.Render (Bitmap, 0, 0, width, height);` `Bitmap.Save ("glyphs.png", Imaging.ImageFormat.Png);` } `public void AddArrowBoids (int x, int y) { int height = height >> 1; int width = width >> 1;`
