its good i like it not for people who are bad at survival games but amazing graphics again dont get this if ur bad at survival games even the eay mode can get kinda annoying. Fun game but it's just foraging on the verge of starving or dehydration for hours and hours with occasional exciting moments. Needs a tutorial. really bad. The predators, tribes, and sanity are not what make this game hard, they're actually the only interesting part of the game in it's no story yet state so why the devs take them out of the easiest difficulty is beyond me. I personally can't last more than a couple days on medium, the only challenge coming from starvation and dehydration as your 3 hunger meters and single hydration meter deplete way too fast It's worth the 20 bucks for the most hardcore survival fans but for me I'll have to wait on the story or further explanation on how to move past constantly foraging on the verge of death for it to be worth it to me.. Just recently cam out, But is an amazingly solid survival game. I would say that it is the most realistic survival game on the market! Difficult, Fun, and ominous at the same time! Definitly my most recommended survival game.. first time play the game is so smooth and now i can't even play the game because whenever you choose new survival, it will freeze the game and then force close.. great concept, fun gameplay. very laggy at high settings and I have a 2070 rtx and a amd ryzen 7 2700x. needs improvement but very fun, definitely recommend and excited for full release.. Great game that i have already put over 24 hours in and still want to play more. Its still early so there is bugs here and there but nothing game destroying, The devs do hotfixes and patches quite often. Its a survival game that you always have something to do, and always on your toes.. Great Survival Game, beautiful graphic, not that hard that many people described it. When you learn some mechanics it become easier and more fun. Ignore negative review about graphics or what so ever. I have Intel I 7, 16 GB RAM and G Force that i bought for 150 e and it runs on maximum. Never encountered a bug, and i played it for 70 hours. I am not saying that there are no bugs, i just never encountered one. Game is in early access, but believe me you will have more then fun. Price is good. I don't get why people are crying and giving negative reviews just because they thought it is multiplayer. Yes it will be, but not still implemented - EA means not all features implemented. These kids, you don't have to give negative review you could just ask for money back. Negative reviews can just hinder game development. I am fed up with people crying about how it is not optimized and they have table calculator to play on. If graphic is not good, then they cry about how graphic is lame. DON'T BE A SHEEP, BUY A GAME do not allow some 10 YEARS SPOILED KID to make decision on your behalf.. wouldn't recommend this until controller support is available. It is addicted to play this survival game. Realistic graphics, craft mechanics and health system.

Mercury Fallen Holodance Unexpected Journey v1.2 Update : \*\*Next Update will be Oct 2019 New Features - 7 new skill - Poison area Improvement - Redo whole game UI - Show Attack and defend - Show the time remains for all status - New day message - Improve tooltips be a better way to show - improve game engine for future - update credit list - status time will be stackable - all status will run on a better way Fixed - material point reset bugs - avoid direct craft with select any item - some equipment some time not working well - auto close panel when recycle, use or drop an item.
